

KitchenMart.pk POS — Client Delivery Checklist

Bhai Gee Crockery Store · Complete handover guide · Save as PDF: Ctrl+P → Save as PDF

Client	Bhai (Bhai Gee Crockery Store)
Location	Karkhana Bazar, Sargodha
Project	ShopPOS WPF + Cloud API (optional)
Developer	_____
Delivery date	_____
Version	v1.0

Note: Existing shop data (products, sales, customers) rakhen — client ne verify kar liya hai. Is checklist mein sirf woh kaam hain jo delivery / install / handover ke liye zaroori hain.

Phase 1 — Release build banana (apne PC par)

- ☐ POS app Release publish: `dotnet publish src\ShopPOS.WPF\ShopPOS.WPF.csproj -c Release -o publish\ClientPOS`
- ☐ Cloud API Release publish (optional): `dotnet publish src\ShopPOS.Api\ShopPOS.Api.csproj -c Release -o publish\ClientCloudApi`
- ☐ Publish folder mein `ShopPOS.WPF.exe` run karke final test
- ☐ Debug build client ko na den — sirf Release / publish folder
- ☐ Source code dena hai ya sirf EXE — client se clear karo aur note karo

Phase 2 — appsettings.json client-ready

- ☐ **ConnectionStrings** — client PC ke SQL Server / LocalDB ke mutabiq set
- ☐ **Hardware:LogoPath** — client logo ka sahi path (OneDrive / dev path hatao)
- ☐ **Hardware:ThermalPrinterName** — shop printer ka naam (agar thermal hai)
- ☐ **CloudSync:ApiBaseUrl** — localhost ya client server URL
- ☐ **CloudSync:ApiKey** — strong naya key (dev key client ko mat do)
- ☐ **CloudSync:ShopId** — kitchenmart-sargodha verify
- ☐ SMS / WhatsApp / Email — disabled rakho jab tak client credentials na de

Sample connection strings

Type	Connection string
------	-------------------

LocalDB	Server=(localdb)\MSSQLLocalDB;Database=BhaiGeePOS;Trusted_Connection=True;
SQL Express	Server=.\SQLEXPRESS;Database=BhaiGeePOS;Trusted_Connection=True;TrustServerCertificate=True;

Phase 3 — Security (zaroori)

- ☐ Owner login: `owner` — password **owner123 se badal kar** naya set karo
- ☐ Sales login: `sales` — password **sales123 se badal kar** naya set karo
- ☐ Settings → Change Password (owner account)
- ☐ Settings → Security Questions save karwao (Forgot Password ke liye)
- ☐ Naye passwords alag sealed note / envelope mein client ko do
- ☐ Default passwords (owner123 / sales123) client ko kabhi mat batao written slip par

Phase 4 — Shop settings verify

- ☐ Shop Name — Bhai Gee Crockery Store / KitchenMart.pk
- ☐ Address — Karkhana Bazar, Sargodha
- ☐ Phone — shop number sahi
- ☐ Currency — Rs.
- ☐ Tax rate — client ke mutabiq
- ☐ Receipt footer message — thank you / return policy text
- ☐ Settings → Save Shop Settings → "Settings Saved" popup aaye

Phase 5 — Full functional test (client machine jaisa)

- ☐ Owner login + salesman login dono test
- ☐ Billing — search, cart, discount, payment, receipt
- ☐ Customer mobile / email (optional fields) test
- ☐ Receipt print (printer connected ho to)
- ☐ Inventory — product edit + save (tracking error fix verify)
- ☐ Returns — original price par refund
- ☐ Sales Report — aaj ki sales dikhe
- ☐ Dashboard — totals sahi

- ☐ Audit Logs — actions log ho rahe hon
- ☐ App band karke dubara kholo — data save hai
- ☐ PC restart ke baad app + data OK

Phase 6 — Cloud sync (optional — agar dena ho)

- ☐ ShopPOS.Api (ClientCloudApi) client PC par copy
- ☐ API startup shortcut / task scheduler (shop khulte hi chale)
- ☐ Settings → Cloud Sync ON → URL + API Key + Shop ID save
- ☐ Sync Now — "Synced X sale(s)..." message
- ☐ Browser: http://localhost:5050 — dashboard sales/stock dikhe
- ☐ Phone same WiFi: http://[PC-IP]:5050 test (optional)
- ☐ Client ko samjhao: API band ho to sync ruke, local data safe rahega

Phase 7 — Client PC install

- ☐ Windows 10 ya 11
- ☐ .NET 10 Desktop Runtime install
- ☐ SQL Server Express ya LocalDB install + running
- ☐ ClientPOS folder copy (USB / network)
- ☐ Logo file sahi folder mein
- ☐ Pehli run — database auto create (EnsureCreated)
- ☐ Desktop shortcut: ShopPOS.WPF.exe
- ☐ Thermal printer driver (agar hai)
- ☐ Barcode scanner USB test

Phase 8 — Client ko denay wali cheezen (package)

- ☐ Folder: **KitchenMart-POS-v1.0**
- ☐ Subfolder: POS (publish ClientPOS)
- ☐ Subfolder: CloudApi (optional)
- ☐ Subfolder: Logo
- ☐ INSTALL guide (Urdu steps)

- ☐ USER guide (billing, returns, inventory, backup)
- ☐ Credentials envelope (owner + sales passwords)
- ☐ Cloud API key note (agar enabled)
- ☐ Developer support number / WhatsApp

Phase 9 — Client training (1–2 ghante)

- ☐ Login — owner vs salesman difference
- ☐ Naya bill kaise banayein
- ☐ Barcode scan / search
- ☐ Return process
- ☐ Inventory price / stock update
- ☐ Din ke end par Sales Report
- ☐ Settings sirf owner ke paas
- ☐ Cloud dashboard phone se dekhna (agar diya)
- ☐ Problem par developer se rabta kaise karein

Phase 10 — Backup instructions (client ko sikhana)

- ☐ SQL Server — BhaiGeePOS database weekly backup
- ☐ Backup file USB / external drive par copy
- ☐ appsettings.json ki copy safe rakhein
- ☐ Cloud sync ON ho to cloud par bhi data backup hai

Phase 11 — Business / legal

- ☐ Delivery note sign — “Installed & tested OK”
- ☐ Payment final / remaining clear
- ☐ Free support period likho (e.g. 30 days bug fix)
- ☐ Us ke baad paid support rate (optional)
- ☐ Scope clear: full internet POS / Firebase abhi included nahi

Phase 12 — Jo abhi included NAHI (client expectations)

Feature	Status
Full POS browser / phone par (Firebase)	Future project — abhi nahi
WhatsApp / SMS auto (bina credentials)	Settings ready — client API chahiye
24/7 free cloud hosting	Nahi — local API ya paid server
Remote access	AnyDesk / RustDesk alag setup

Default logins (sirf pehli dafa — password change ke baad delete)

Role	Username	Default (change karo)
Owner	owner	owner123
Salesman	sales	sales123

Final sign-off

☐ Sari upar wali checklist complete

☐ Client ne khud 1 test sale ki

☐ Passwords change ho chuke

☐ Package USB / PC par copy ho gaya

☐ Training complete

☐ Payment / delivery note done
